

PEUGEOT **EXPERT**

PEUGEOT

THE EXPERT REFLECTS YOUR PROFESSIONALISM

Designed for professionals and by professionals, the Expert range combines style, practicality, dynamism and innovation. A true work tool, efficient and suited to the job, its equipment is functional and practical. The loading sill is the lowest on the market (when fitted with pneumatic suspension). The practical interior space can be used to its full capacity and hinged rear doors open to 180° to make loading easy. Better than a business card, your vehicle reflects your professional image. The Peugeot badge reflects your dynamism, your reliability and your performance. Comfortable and pleasant to drive, the Expert is designed for you and your business, and for those who are going to drive them.

THE EXPERT RANGE, A VAST CHOICE FOR ALL NEEDS

As no two businesses are the same, our Expert range offers you a vast choice of configurations: 3 volumes, 2 payloads and 3 HDi diesel engines. You can be sure of finding the Expert that meets all your requirements.

Whatever your choice, the Expert is everything you are looking for in terms of comfort, loading capacity, durability and safety.

Your Expert is offered as a panel or window van. Each model is available in 2 lengths and 2 heights (with standard suspension or pneumatic suspension) with a load volume of 5, 6 and 7 m³.

A platform cab (length 5.13 m) is also available which is suitable for a number of conversion options.

DIMENSIONS SUITED TO YOUR REQUIREMENTS

A VERSATILE RANGE

In order to be suited to as many uses as possible, the range of Expert vans is available in two lengths (4.80 and 5.13 m) and two heights (1.94 m and 2.27 m with

standard suspension, or 1.90 m and 2.20 m with pneumatic suspension).

The interior floor lengths are 2.26 m and 2.56 m according to version.

L2H2

L2H1

L1H1

↑ **2 Heights** 1.94 m and 2.27 m with standard suspension and 1.90 m and 2.20 m with pneumatic suspension

↔ **2 Lengths** 4.80 m and 5.13 m

A LOAD SPACE THAT SIMPLIFIES YOUR LIFE

LOADING SILL

To make handling merchandise or materials easier, the Expert's loading sill is the lowest on the market when fitted with optional

adjustable pneumatic suspension* which can be adjusted when stationary: a height of only 45 cm in the low position.

*Available as an option according to version.

PAYLOAD

The Expert has payload options of 1000 kg or 1200 kg. The platform cab can also accommodate a payload of 1200 kg.

STOWING RINGS*

To guarantee maximum safety, 8 stowing rings, arranged on each side of the rear load space, can be

used to secure a load on the floor of the vehicle.

* Straps not supplied.

GVW of 2.6T and 2.9T

3 volumes 5, 6 and 7m³

SLIDING SIDE DOORS

Guided by two bearing rails and a rail at the top, the Expert has standard twin sliding side doors. Particular attention has been paid to the design of the opening handles to make manoeuvring the doors easier.

At the rear, the width of the opening allows loading of a Euro-palette. * Available as an option according to version.

HINGED REAR DOORS

The two panel or glazed hinged rear doors open to 180° to make loading easier. On the long and high version, the Expert is fitted with special rear doors, adapted to its height.

EASE OF DRIVING

SUSPENSION (STANDARD / PNEUMATIC)

The Expert offers a choice between two types of rear suspension: metal or pneumatic. The latter allows the vehicle to remain at an overall height of 1.90 m and a constant ride height, regardless of the load.

When stationary, it allows adjustment

of the height of the loading sill by means of a manual control.

STEERING

For greater driving pleasure and extra fuel economy, the Expert is fitted, according to engine, with hydraulic power steering (1.6 l HDi 90 engine) or electrohydraulic power steering (2.0 l HDi 120 and 136 engines).

PNEUMATIC SUSPENSION

Specifically developed by Peugeot for the Expert, the pneumatic suspension offers several advantages:

An overall height of 1.90 m

The Expert, fitted with pneumatic suspension, allows you to park in car parks with access limited to 1.90 m.

A constant ride height

Regardless of the vehicle's load, the ride height remains constant.

Loading sill

A button in the boot permits adjustment of the loading sill. So, in the low position, it is the lowest on the market, offering optimum ease of loading.

In this case, the electropump assembly is controlled according to the speed of the vehicle and the speed of rotation of the steering wheel, irrespective of the engine speed.

FRONT / REAR SUSPENSION

When a vehicle is a work tool, you have to be able to count on it in all circumstances. The quality of its suspension and wheels gives the Expert benchmark stability.

Regardless of the load, the rigidity of the body and independent pseudo Mac Pherson type front suspension with independent wheels, optimise road holding. The semi-deformable rear suspension provides an excellent level of active safety.

STOPS / DAMPERS

The Expert has long, dense travel stops. By continuously adjusting their rigidity and load flexibility, these stops form the link between the front and rear suspension, providing stable

vehicle handling and an excellent level of comfort, even when empty. The dampers have been designed to provide excellent support of the vehicle body and enviable suspension comfort.

WORK IN COMPLETE COMFORT

A working vehicle used every day must be ergonomic, practical and comfortable. The interior is functional and innovative and equipped with comfortable seats providing excellent support. The Expert also offers a visibility pack, available as an option, which includes automatic rain sensing wipers, automatic headlamp control, air conditioning with pollen filter (with activated carbon) and

a passenger compartment air recirculation system. The Expert also offers numerous storage compartments which make everyday life easier.

1. Overhead storage compartment*

A storage space located below the roof, above the front passengers, the overhead storage compartment can accommodate files or small essential objects.

* Open or closed according to equipment.

1.

2.

3.

4.

5.

6.

2. Lumbar adjustment*

To provide a better driving position, the driver's seat can be fitted with a lever lumbar adjustment control on the side of the seat back.

3. Bench seat / Individual passenger seat*

You can fit your Expert with an individual passenger seat in place of the 2-seat bench.

*Available as an option.

4. Desk panel*

Located on the passenger bench seat, this transforms your Expert into an office space

*Not available with the individual passenger seat option.

5. Glove box

Lockable, this can be used to hold your drinks, thanks to the 2 can holder recesses.

6. Storage trays

THE BEST OF TECHNOLOGY

Trips in town or long journeys on the main road: the driver's information and comfort help him to travel with maximum

efficiency. The Expert has technology previously only seen in passenger cars.

PC SOUND RADIO CD MP3

The Expert's control panel incorporates a radio/single CD, with steering wheel control. The sound is emitted by 2 speakers and 2 tweeters.

MULTIMEDIA SYSTEMS

The Expert offers a choice of interactive multimedia systems. Peugeot Connect Navigation (RNEG) has a 7 inch colour screen and combines three functions: radio, Bluetooth® hands-free kit and GPS navigation.

PEUGEOT CONNECT USB

As an option, the PC Connect system, which incorporates the Bluetooth® function, allows you to connect digital portable equipment via a USB port to listen to your favourite music in complete freedom.

EXTERIOR MIRRORS

Their double mirror makes parking manoeuvres easier and provides better coverage of the blind spot on the driver's side. The exterior mirrors can be adjusted, folded electrically* from the inside and heated** at the same time as the demisting of the rear screen.

* As an option only.

** As standard or optional according to version..

AUDIBLE REAR PARKING ASSISTANCE

Activated when reverse gear is engaged, ultrasonic sensors warn you of the presence of an obstacle, or person, near the rear of the vehicle. The frequency of the audible signal increases until it becomes continuous when the obstacle is less than 30 cm away.

PEUGEOT AND THE ENVIRONMENT

The Expert's engines all comply with the Euro 4 standard and are designed to facilitate your journeys and increase your efficiency. They all work towards the same objectives: a desire for economy and protection of the environment.

HDi TECHNOLOGY

A source of performance and economy, the Common Rail injection system is featured on every Expert HDi engine. By injecting fuel at high pressure directly into the combustion chamber, this system reduces fuel consumption and provides extra power, in compliance with the Euro 4 emission control standards.

PEF

The Particle Emission Filter (PEF) technology reduces emissions of pollutant particles without reducing power or performance.

SMOOTH AND DYNAMIC DRIVING

A choice of three engines

For your Expert, you can choose from three HDi diesel engines, one of which is bound to meet your requirements.

1.6 l HDi 90 bhp

This engine has 16 valves, a double overhead camshaft and a fixed geometry turbo. Lively and powerful, it is very economical and perfectly suited to driving in town

2,0 L HDi 120 bhp

Compared with the 90 bhp version, the 2.0 l HDi 120 bhp adopts a variable geometry turbo. Its specifications make it an ideal engine both for short trips in town and longer journeys on main roads.

2.0 L HDi 136 bhp FAP

This engine is fitted with the Particle Emission Filter to reduce harmful emissions without compromising performance and economy.

PROTECTIVE INTELLIGENCE

The Expert is a modern vehicle which offers all the latest equipment intended to improve the safety of the driver and passengers.

Fitted on the Expert as an option or as standard*, several technologies contribute to providing greater safety:

ANTICIPATE

ABS, EBA

- the anti-lock braking system (ABS) controls your trajectory during emergency braking,
- the Emergency Braking Assistance (EBA) provides additional assistance on sharp braking which increases the braking pressure and reduces the stopping distance to a minimum.

ESP*

- ESP prevents wheel slip in the event of loss of traction
- the ROM module, by acting on the brakes, limits the risks of the vehicle rolling over in the event of extreme transverse acceleration
- the Dynamic Stability Control (DSC) continuously compares the information transmitted by the steering wheel sensor and the yaw sensor to detect any incipient understeer or oversteer. It then initiates corrective actions to maintain the trajectory initially required by the driver.

*Optional according to version.

BRAKING

In order to optimise the efficiency, endurance and reliability of the braking, all Expert models are fitted with four disc brakes (with the exception of the L1H1 1.6L HDi van with standard suspension, which has drum brakes at the rear).

SPEED LIMITER AND CRUISE CONTROL*

Your vehicle can be fitted with cruise control and a speed limiter. The cruise control allows you to maintain a constant speed regardless of the relief of the road and without having to press the accelerator. The speed limiter deactivates the accelerator as soon as a programmed speed is reached.

*Optional.

PROTECT

REINFORCED STRUCTURE

The design of the body frame ensures energy absorption in the event of an impact in order to protect the occupants. The integrity of the passenger compartment is guaranteed by the securing of the engine on the subframe and providing reinforcement inside the doors. The front bumper has a high absorption capacity thanks to a beam mounted on dampers screwed to the chassis leg

IMPACT

Reinforced seat fittings and controlled displacement of the pedal bracket and steering column (allowing the steering wheel to retract by 80mm), reduce injury in the event of front impact. Particular attention has been paid to the displacement of hard incompressible masses in the engine compartment to limit intrusion into the passenger compartment.

AIR BAGS

Fitted as standard, the driver's front air bag located in the steering wheel pad protects the chest and head. A front passenger air bag, designed to cover both the individual passenger seat configuration and the 2-seat bench configuration, can also be installed, as well as 2 side air bags* in the backs of the individual seats.

*Optional.

SEAT BELTS

Height adjustable 3-point seat belts are equipped with pretensioners and force limiters to reduce the physical force to which side occupants may be exposed.

HEAD RESTRAINTS

The head restraints are fitted on the front seats. They can be removed and their height can be adjusted to adapt to the size of the occupant.

DRIVER'S SEAT PROTECTION

Behind the driver's seat, a vertical ladder provides the driver with the best possible protection against the risks of load movement. A number of bulkhead options are also available.

WARN

FASTEN SEAT BELT INDICATOR

A visual warning, supplemented by an audible warning when the Expert exceeds 10 mph (15 km/h), indicates the driver's seat is unfastened.

IT IS ALWAYS ON ITS GUARD

INGENIOUS SECURITY DEVICES

Ingenious security devices supplement the Expert's protection equipment:

- separate unlocking of the cab and load compartment using the remote control,
- locking of the load space from the cab,
- visible marking of the vehicle identification number

CENTRAL LOCKING / UNLOCKING CONTROL

Located on the centre console, this activates the normal locking. An additional control permits locking / unlocking of the rear compartment only. When the Expert is moving, the automatic locking of the doors function is activated when the speed reaches 6 mph (10 km/h).

In the event of an impact, the doors unlock automatically.

HAZARD WARNING LAMPS SWITCH

Close to hand for both the driver and passengers, the hazard warning lamps switch can be identified very easily. It is triangular, red, and placed on the fascia's central control panel.

OPEN DOOR LOCATOR

If a door is left open, including those in the load compartment, you are alerted by a warning lamp on the instrument panel, or by the multifunction screen if your Expert has one.

LOCKING / UNLOCKING

On the remote control, three buttons trigger the locking / unlocking of all the doors, of the cab only or of the rear compartment. From his seat, the driver can lock or unlock the entire vehicle, the front cab only or the rear compartment only. To make identification of your Expert easier, its chassis number is engraved at the base of the windscreen.

DRIVER'S ELECTRIC WINDOW SAFETY SYSTEM

The one-touch control for the driver's electric window has an anti-pinch system: if the window detects an obstacle, it reverses its direction of movement.

THEFT PROTECTION / INTEGRITY OF THE VEHICLE

The Expert's mechanical protection devices have earned it a high level Thatcham security rating: single exterior lock with a high level of tamper protection, disengageable and anti-pick, lock control cable connection protective plate.

DEADLOCKING

These systems render all of the interior opening controls inoperative, so there is no point trying to break in by breaking a window.

* Optional.

CODED ENGINE IMMOBILISER

This electronic immobiliser system pairs the engine ECU and the BSI so that the vehicle can operate. In the same way, the audio and telematic equipment needs to be paired with the BSI.

SPECIAL PROTECTION SYSTEMS

- An anti-theft mechanism locks the steering if there is an attempt to break the visible part of the steering column.
- The spare wheel can only be accessed from the rear compartment.

PEUGEOT AND YOU

When you choose Peugeot, you have the reassurance of knowing that your vehicle has been designed and manufactured to give you years of worry-free motoring. What's more, as a Peugeot owner, you can rely on a comprehensive range of customer care services from your Dealer. So you can be sure that you're talking to a specialist who'll listen to you, understand your problems and respond efficiently – someone who also has the expertise to maintain your Peugeot correctly, using trained technicians, Peugeot Diagnostic Equipment and Peugeot Original Equipment Parts.

PEUGEOT WARRANTIES

As well as the 2 year unlimited mileage manufacturer's Warranty, all vehicles first registered in the UK and purchased from a UK Peugeot Dealer come with a free, optional additional year of Warranty through the Peugeot UK Dealer network. The mileage limit on this additional Warranty is 60,000 miles (100,000 miles for Boxer vans excluding Motorhomes and other converted vehicles) from first registration. At the end of the 3 year Warranty period (or after 60,000 miles) you have the option to purchase a Peugeot Platinum Extended Warranty. Our cars also come with a 12 Year Anti-Perforation and 3 Year Paint Warranty (6 and 2 years on vans). For full terms and conditions on all of these, please contact your Peugeot Dealer.

PEUGEOT ASSISTANCE

All new Peugeots come with 12 months Peugeot Assistance – our breakdown assistance service. This covers all incidents involving vehicle-based faults for you and anyone else driving your car with your permission. It is available 24/7, 365 days a year. Peugeot Assistance includes European cover, homestart, roadside assistance, vehicle recovery

and a free replacement car or hotel accommodation if required. It can be extended for a further 12 months, or 24 months, and to protect you against non-vehicle faults (such as punctures) at specially discounted rates, by calling 0870 752 7050.

PEUGEOT SERVICE CARE

Peugeot vehicles benefit from extended service intervals of up to 20,000 miles or 2 years (12,000 miles for 1.6 HDi diesel ; 24,000 miles or 2 years on Boxer, 10,000 miles or 1 year on 107). Please refer to the maintenance book for details of the service intervals for specific models and vehicles operating in arduous conditions. Finance – Let the Specialists help. Peugeot Financial Services offer a number of flexible finance plans that make owning a new Peugeot easy. We specialise in car finance and can provide you with choice, convenience and flexibility directly through your local dealer. Written quotations are available on request from: Peugeot Financial Services, Quadrant House, Princess Way, Redhill, RH1 1QA. Over 18's only, a guarantee may be required.

PEUGEOT INSURANCE

Peugeot Insurance has been designed specifically for Peugeots and offers tailored cover at a competitive price. If you are unfortunate enough to have an accident, one of our Peugeot Approved Accident Repair Centres will repair your car, using only Peugeot original parts. Plus we'll give you a courtesy car while yours is being repaired (subject to availability when you use an approved repairer). When the time comes to renew your insurance cover, why not try Peugeot Insurance?

You can call Peugeot Insurance for a quote on 0870 0240 206.

Lines open 8am-8pm weekdays, 9am- 5pm Saturdays. Max call charge from a BT landline is 8p per minute. Calls from other networks may vary. Calls may be recorded. Peugeot Insurance is underwritten by UK Insurance Limited. Conditions apply.

PEUGEOT AND THE ENVIRONMENT

Our website has full details on all Peugeot products, and offers available in the UK. You'll also find information about our environmental and recycling policies.

The information contained in this brochure is based on the data and images available at the time of printing. Some feature combinations may not be available in the UK. Also, some photography may feature vehicles which are left hand drive. As part of our policy of continuous specification improvement, Peugeot reserve the right to modify technical equipment, the options available, and colours at any time. For full specification ask your Peugeot Dealer, or click on www.peugeot.co.uk. Please note that print and photographic processes used in the creation of this brochure may alter the depth and tone of the colours shown. This brochure is not a contractual document or offer of sale. The details in this brochure cannot be reproduced without the expressed authorisation of Peugeot.
